CURRENT ELECTRIC MOTOR SCOOTERS

Founded by engineers tired of expensive, wimpy electric vehicles, Current Motor Company fills the previously un-met need for practical, affordable, zero-emission electric vehicles. Based in Ann Arbor, Michigan, Current develops and manufactures affordable all-electric motorcycles and motor scooters that outlast and outperform anything else on the market. www.currentmotor.com

Join us for dinner and a short introduction and history of Current Motor Company as well as technical information related to Current's motor scooters. We are honored to have Erik Kauppi, Chief Engineer, present at our event.

Erik Kauppi

Chief Engineer

Erik is the owner, founder and manager of Corsa Instruments, an automotive electronics company. He has been involved in other start-up ventures as well. Previously, Erik worked at Ford Motor Company in Manufacturing Engineering. He earned a Bachelor of Science Degree in Mechanical Engineering at Kettering University. Erik is the Chief Engineer of Current Motor Company, and will be our presenter.

Reservations Required by Noon Thursday March 10, 2011. Contact **Bernard Santavy** at: (810)-635-7948 or SAEMidMichSec@cs.com or online at: midmichigansae.org.
